DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6, 8, 9, 10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Schaus (US-6523651).

Regarding claim 1, Schaus discloses a rotatable hub (16) having an outwardly projecting radial flange (20) defining an outwardly facing edge, a braking rotor (14) which is integral with or fixed for rotation with a flange (15) which projects radially inwards and which defines an opening with an internal edge, wherein the edges of the two flanges are adjacent to each other and face each other radially (fig 3), wherein the edges have, at least along one portion thereof, the same non-circular shape in the same radial plane (fig 3).

Regarding claims 2-4, see edges of flanges 15, fitting into cavity (17) and are substantially aligned in the same radial plane (figs 2-4).

Regarding claim 6, see cavity (17) and flanges (15) projected radially inwardly.

Regarding claim 8, see flange and outward edges of (20) in figs 2-4.

Regarding claim 9, see (20), fig 1.

Regarding claim 10, see (14) in fig 3, flanges (15) and cavity (17) in which (20) projects into.

Regarding claim 12, Schaus discloses the recited structure as seen in figure 1-4. Product by process claims are not limited to the manipulations of the recited steps, only the structure. See MPEP 2113.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brunetto, Tedesco, Gripemark, Burgoon, Yamamoto, and Gross were all used during examination but were not relied upon for rejection.
